

MESO SCHOOL ~~2020~~ 2021

FUNDAMENTALS AND ADVANCES IN MESOSCOPIC QUANTUM PHYSICS: QUANTUM CIRCUITS, TOPOLOGY AND CORRELATIONS

4 October - 15 October 2021

Institut d'Etudes Scientifiques de Cargèse, Corsica

Coherent transport at low and high frequency

Mesoscopic superconductivity

Quantum information with circuits

Graphene and TMD

Dirac materials

Interactions

Optomechanics

Quantum detectors

Scanning probes

SPEAKERS:

Anne Anthore (U. Diderot & C2N, France)

Alexandre Blais (U. Sherbrooke, Canada)

Piet Brouwer (Freie U. Berlin, Germany)

Richard Deblock (LPS Orsay, France)

Michel Devoret (Yale U., USA)

Anaïs Dréau (L2C, France)

Eva Dupont-Ferrier (U. Sherbrooke, Canada)

Max Hofheinz (U. Sherbrooke, Canada)

Zaki Leghtas (ENS Paris, France)

Julia Meyer (UGA CEA Grenoble, France)

Christophe Mora (ENS Paris, France)

Nicolas Roch (I. Neel, Grenoble, France)

Benjamin Sacépé (I. Neel, Grenoble, France)

Gary Steele (TU Delft, Netherlands)

Cristian Urbina (CEA Saclay, France)

Clemens Winkelmann (I. Neel, Grenoble, France)

Eli Zeldov (Weizmann I., Israel)

Info & registration:

<https://mesoschool2021.sciencesconf.org/>

ORGANIZERS:

Sophie Guéron (LPS Orsay, France)

Benjamin Huard (ENS Lyon, France)

François Parmentier (CEA Saclay, France)

Marie-France Mariotto (LPS Orsay, France)
